THE 1984 STUDY OF MEDIA AND MARKETS

The 1984 Study of Media and Markets is based on a total of 19,110 adults and is projectable to the population age 18 years and over living in the coterminous 48 states of the United States. The interview period extended from August 29, 1983 through July 6, 1984.

The complete details of the design and conduct of the Study are published in a separately bound Technical Guide. The Study findings, which also will be available on computer tape, will be published in 43 separate report volumes over the period between August 1984 and February 1985.

1984 SMRB Study Procedures

The total data collection workload, which is the basis for the contents of the report volumes, is apportioned in a modular fashion over several administratively feasible interview units as follows:

- Publications and demographic questionings are distributed over two separate personal interviews.

- Product data are obtained from a separate, self-administered questionnaire, placed at the time of the initial interview and recovered by the interviewer at the time of the second interview.

- TV viewing data are derived from a separate diary kept for two consecutive weeks, in which the respondent records his own in-home viewing only. These diaries are mailed to a sub-sample of respondents participating in the 1984 Study of Media and Markets.

- Radio listening data are also derived from a sub-sample of participants in the 1984 Study of Media and Markets. Listening for a single weekday is obtained in the second personal interview; information for an additional weekday is collected from a telephone interview or, for respondents without phone numbers, from a two-weekday diary.

Volumes included in 1984 SMRB Study

The volumes included in the Media series are as follows:

M-1	Publications: Total Audiences
M-2	Publications: In-Home Audiences
M-3	Publications: Reach And Frequency/Mean Reading Days
M-4	Publications: Duplication Of Audiences
M-5	Multi-Media Audiences: Adults
M-6	Multi-Media Audiences: Males
M-7	Multi-Media Audiences: Females
M-8	Multi-Media Audiences: Female Homemakers
M-9	Multi-Media Audiences: Professionals And Managers
M-10	Multi-Media Audiences: Mothers
M-11	Broadcast And Outdoor: Reach And Frequency
M-12	Television: Attentiveness And Special Events
M-13	Multi-Media Audiences: Media Imperatives

The following volumes are included in the Product series:

P-1	Automobiles
P-2	Cycles, Trucks, Vans & Tires
P-3	Automotive Products & Services
P-4	Travel
P-5	Banking, Investments, Memberships, Public Activities & Contributions
P-6	Insurance & Credit Cards
P-7	Books, Records, Tapes, Stereo & TV
P-8	Appliances, Sewing & Garden Care
P-9	Home Furnishings & Home Improvements
P-10	Sports & Leisure
P-11	Restaurants, Stores & Grocery Shopping
P-12	At Home Shopping, Yellow Pages, Florists & Telegrams
P-13	Jewelry, Watches, Luggage, Binoculars, Pens & Pencils & Men's Apparel
P-14	Women's Apparel
P-15	Tobacco Products & Photography
P-16	Distilled Spirits & Mixes
P-17	Malt Beverages & Wine
P-18	Coffee, Tea, Milk, Soft Drinks, Juices & Bottled Water
P-19	Dairy Products, Spreads, Cookies, Desserts & Baking & Bread Products
P-20	Cereals, Rice, Pasta, Pizza, Mexican Foods, Fruits & Vegetables
P-21	Soup, Meat, Fish, Poultry, Condiments & Dressings
P-22	Chewing Gum, Candy & Snacks
P-23	Soap, Laundry & Paper Products & Kitchen Wraps
P-24	Household Cleaners, Room Deodorizers & Pet Foods
P-25	Health Care Products & Remedies
P-26	Oral Hygiene Products, Skin Care & Deodorants
P-27	Hair Care & Shaving Products
P-28	Women's Beauty Aids, Cosmetics & Personal Products
P-29	Games & Toys, Children's & Babies' Apparel & Specialty Products
P-30	Relative Volume of Consumption

REPORT FORMAT AND STANDARDS

The standard format used in this report presents a four item data set:

A	B	C	D
	%	Across	
'000	Down	%	INDX

"A" is the projected number of people, in thousands, in the cell defined by the heading and stub for the column and row concerned.

"B" is the result of percentaging this number "down" using the group defined by the heading as the base. For demographic stub items, this gives PROFILE. For media stub items, this give COVERAGE or RATING.

"C" is the result of percentaging this number "across" using the group defined by the stub as the base. For demographic stub items, this gives PENETRATION. For media stub items, this gives COMPOSITION.

"D" is an index of selectivity calculated by dividing C (Across %) by the across percent for the universe concerned (adults, males, females, etc.). Example: an index of 120 indicates that the group defined by the stub is 20% more likely to be in the group defined by the heading than is the total universe. +++ is the symbol used when the calculation yields a four-digit index.

Asterisk Pattern

*** Projections that are relatively unstable are denoted by an asterisk and should be used with considerable caution.**

In all of the SMRB reports, projections so designated resulted from not less than thirty-one nor more than sixty actual interviews. The size of the projections bearing an asterisk may vary widely, depending upon the distribution of the projected interviews among the income strata.

For media audiences, interview counts are derived as follows:

Print Media:	Addition of the Phase I and Phase II interviews. (For magazine groups (GROSS), net readers on Phase I and net readers on Phase II are added.)
Radio:	Addition of the net audience on weekday 1 and the net audience on weekday 2.
Television:	Addition of the net audience on week 1 and the net audience on week 2.

**Double asterisks have been used in all of the SMRB reports to designate projections resulting from thirty or fewer interviews. These projections are not sufficiently reliable to be used safely alone and have been included for consistency only, to permit the combination of such break-downs into larger groups without loss of information. Under no circumstances should they be used in any other way.

Rounding

All projections are rounded to the nearest thousand. Because the projections have been independently rounded, some totals will not correspond to the sum of the breaks shown in the table. However, the discrepancies should not exceed an integer equal to one-half the number of detail breaks. This rounding factor can also exist between tables; that is, comparable male and female audiences will sum to the published total adult audience plus or minus the rounding factor.

Reliability of Results

Each estimate in this volume and all other SMRB reports is subject to sampling tolerances. A table specifying the tolerances for major audiences and a method for estimating these tolerances for all other data published in the reports is provided in the 1984 SMRB Technical Guide. The Technical Guide also enumerates unweighted base counts for all the publications and major demographic groups reported.

Weight Watchers

Weight Watchers was not included in the 1984 Study until January, 1984. Approximately one-third of the interviewing had already been completed. As a result, the audience ratings for this magazine are based upon the coverage estimates (ratings) obtained from the last two-thirds of the sample. Readership was ascribed to the first-third of the sample to reflect these ratings.

Decision Maker

The opportunity to determine who participates in the decision making process is provided for selected products or services via a question such as "Who decides which brand you use?" Summary pages, and in some cases, report tables incorporate these decision maker questions.

In volumes P-1 (Automobiles) and P-2 (Cycles, Trucks, Vans & Tires), some tables are presented on the basis of adult decision makers, male decision makers, female decision makers. The numbers on these tables are projected from respondents who participated in the decision making process as evidenced by their response of "yourself." Percentages are calculated on the total population.

Summary Pages

The foundations for all data appearing with a P series report are shown on the summary pages. Each question as it appears in the Product Information Booklet together with response selections are itemized in terms of population projections and percentages and unweighted counts. To fully understand the base of the tables being reported, and consequently to interpret the data correctly, it is advisable to refer to the summary page for the exact wording of questions. This suggestion will be particularly useful when using tables that derive from a household measurement. For example, a summary page incorporates the question: "Do you or other members of your household own any of the following...?" On a report page for adult males the ownership of one of the items is covered. The figure for the item owned should be interpreted as: the number of males who live in a household in which a household member owns the item.

Figures in "Net" columns are derived from an unduplicated count of respondents for the specific answer category. For example, if a business trip was taken on the last, second last and third last trips, the respondent is credited in each trip category for business reasons but counted only once on the net line for business. An exception to this procedure is in the presentation of "Do Not Know." "Do Not Know" in the net column is credited only when it is the sole answer across all the choices. Again using travel as an illustration, if the last trip was for vacation and no reason was given for the second last trip, the respondent would be counted on the net line for "vacation" and excluded from the net line for "do not know."

A single asterisk (*) may appear in the percentage column. It is used when the projected population is less than 0.05 percent.

Heavy, medium and light users are defined on the summary page. Frequencies that comprise each group are identified by an H, M or L.

When presented on a report table, the users that constitute each frequency group are identified as heavy users, medium users, or light users if three frequency distributions are created, or heavy users vs. light users if two frequency classifications are shown. The percentages on these tables relate to the population described on the table.

Percent Of Users And Usage

Percent users and percent usage for heavy, medium and light usage categories appear, where applicable, on independent tables following the tables in the body of the report. The manner in which the calculations on these tables are made is described below.

Percent of consumption is calculated by assigning weights to each use category for the product or service being reported. The number of users is then multiplied by the assigned weight to derive the weighted consumption. The weighted consumption is summed and the resulting total is the base (100%) for the computation.

An example of a hypothetical product category follows:

Number Used in Household in Last 7 Days	H/M/L Designations	Assigned Weight	X	Product Users ('000)	=	Weighted Consumption ('000)
10 or more	H	10.0		5309		53090.0
8-9	H	8.5		4341		36898.5
6-7	M	6.5		5078		33007.0
5	M	5.0		3941		19705.0
4	L	4.0		5172		20688.0
3	L	3.0		1556		4668.0
2	L	2.0		2691		5382.0
1 or less	L	0.5		329		164.5
NONE	L	0		19		0
						173603.0

The percent of consumption for this illustration will be:

Heavy Users	51.8%
Medium Users	30.4
Light Users	17.8
	100.0%

This same procedure is used to define percent of consumption for any type of consumption such as number used and frequency of use.

STANDARD REPORT STUB

The standard report stub, appearing in this volume, covers the following major areas:

Demographics
Quintiles/Terciles of Media Exposure
Media Imperatives®
Publication Audiences
Outdoor Advertising Audiences
Radio Audiences
Television Audiences
Cable Television

DEMOGRAPHICS

Definitions of the following demographic terms, used in the reports, are provided in the Technical Guide:

Area of Dominant Influence
Census Regions
County Size
Education
Employed Mothers
Female Homemakers
Household
Household Head
Index of Social Position
Industry
Locality Type
Marketing Regions
Occupation*
Parents
Professionals and Managers*
Race
Residence Ownership
Spanish-Speaking

*In revising occupational classifications for the 1980 Census, the Bureau of Census made certain changes in the broadest groupings. In line with these changes, the 1984 SMM groups Technicians with Clerical/Sales. In 1983 it was grouped with Professionals. Professionals and Managers excludes Technicians in the 1984 SMM whereas it included them in 1983. The group "Craftsman/Foreman" has been renamed "Precision/Craft" in the 1984 SMM.

QUINTILES/TERCILES OF MEDIA EXPOSURE

Quintile/tercile groups for nine media types - magazines, newspapers, outdoor, drive time radio, mid-day radio, total radio, prime time television, daytime television and total television - are reported. In addition, quintiles for fringe (early & late) television are shown in volumes M-5 through M-10.

In the report, quintiles are designated as 1 through 5 with quintile 1 being the highest group and quintile 5 being the lowest group. Terciles are shown as tercile 1 through 3 with tercile 1 being the highest group and tercile 3 being the lowest group.

Quintiles and terciles are defined separately for males and females using the weighted data for the 19,110 respondents. Once a given respondent is assigned to a specific quintile or tercile, his membership in that quintile or tercile is maintained regardless of the demographic group being reported: a female belonging to quintile 5 (lowest) will remain in that quintile regardless of whether she is reported as a mother, female homemaker, professional or manager, or an adult. Therefore, for bases other than males and females, the size of a given quintile need not approach 20%.

Definitions for the quintile and tercile groups follow:

	HIGHEST GROUP	SECOND GROUP	MIDDLE GROUP	FOURTH GROUP	LOWEST GROUP
MAGAZINES	Based on number of 108 publications studied and reported.				
Men	8 or More	5-7	3-4	1-2	None
Women	10 or More	6-9	4-5	2-3	0-1
NEWSPAPERS	Based on number of weekday newspapers read in the two days studied and weekend/Sunday newspapers read in the two weeks studied.				
Men	5 or More	4	3	2	0-1
Women	5 or More	4	3	1-2	None
OUTDOOR ADVERTISING	Based on the estimated frequency of exposure to a 100 showing for 30 days.				
Men	42 or More	21-41	10-20	3-9	0-2
Women	42 or More	21-41	10-20	3-9	0-2
RADIO	Groupings are defined in terms of the number of quarter hours listened to on two weekdays.				
Drive Time	Based on number of quarter hours listened to on two weekdays Monday through Friday, 6am to 10am and 3pm to 7pm.				
Men	22 or More	13-21	8-12	3-7	0-2
Women	22 or More	13-21	7-12	1-6	None

	HIGHEST GROUP	SECOND GROUP	MIDDLE GROUP	FOURTH GROUP	LOWEST GROUP
RADIO (Cont'd)					
Mid Day	Based on number of quarter hours listened to on two weekdays Monday through Friday, 10am to 3pm.				
Men	12 or More		1-11		None
Women	13 or More		1-12		None
All Day	Based on number of quarter hours listened to on two weekdays Monday through Friday.				
Men	44 or More	24-43	13-23	6-12	0-5
Women	42 or More	23-41	12-22	4-11	0-3
TELEVISION	Groupings are defined in terms of the number of half hours viewed in two weeks.				
Prime Time	Based on number of half hours viewed in two weeks Sunday 7 pm to 11 pm and Monday through Saturday 8 pm to 11 pm.				
Men	54 or More	38-53	26-37	14-25	0-13
Women	58 or More	43-57	30-42	16-29	0-15
Daytime	Based on number of half hours viewed in two weeks Monday through Friday, 10 am to 4:30 pm.				
Men	12 or More		1-11		None
Women	27 or More		2-26		0-1
Fringe Time (Early And Late)	Based on number of half hours viewed in two weeks Monday through Friday, 4:30 pm to 7:30 pm and 11 pm to 1 am.				
Men	34 or More	22-33	14-21	6-13	0-5
Women	37 or More	25-36	14-24	6-13	0-5
All Day	Based on number of half hours viewed in two weeks Monday through Sunday, 8 am to 2 am.				
Men	128 or More	87-127	61-86	36-60	0-35
Women	159 or More	111-158	77-110	42-76	0-41

MEDIA IMPERATIVES®

The concept of Media Imperatives® was introduced at the 21st Annual Conference of the Advertising Research Foundation in November 1975 as a way of classifying consumers according to their magazine reading and television viewing behavior.

An extension of this concept is appropriate for analyzing exposure to other media. Consequently, the pairing of the five media into the following segments has been made:

Magazines	- Newspapers	Newspapers	- Radio
Magazines	- Outdoor	Newspapers	- Television
Magazines	- Radio	Outdoor	- Radio
Magazines	- Television	Outdoor	- Television
Newspapers	- Outdoor	Radio	- Television

Respondents were segmented (as shown above) into quintiles for magazines, newspapers, total television, total radio and 100 showing - 30 day outdoor to create approximately equal size groups. These segments were cross-tabulated for each of the paired media noted above and four mutually exclusive groups resulted -- an Imperative group for each of the paired media, a Dual Audience group and a Lightly Exposed group.

As in the 1983 study, the intersection of the middle groups is assigned to Dual Audience.

A diagrammatic representation and pairing definitions follow: (Each of the ten media pairings has been diagrammed with definitions in the Technical Guide.)

PUBLICATION AUDIENCES

A detailed explanation of the questioning procedures and audience definitions used for various types of publications appears in the Technical Guide.

Magazines and weekly newspapers were measured by the "through-the-book" editorial interest method. The New York Times Daily Edition, Wall Street Journal, USA Today, and daily newspapers were measured by the "read yesterday" method. Sunday/weekend newspapers were measured by the "read last Saturday or since last Saturday" procedure. The audiences for Family Weekly, the Los Angeles Times HOME Magazine, The New York Times Magazine, Parade Magazine, and the National Sunday Magazine Package are defined through readership of the Sunday/weekend carrier newspapers, which are listed in the Technical Guide. Recipients of Blair Inserts are defined through readership of the Sunday/weekend newspapers included in the Blair group, which are also listed in the Technical Guide.

Magazine Groups

The reports include audience estimates for eleven different magazine groups. For each of these groups, gross audience estimates are printed in the volumes, and both gross and net audience punches are provided on the computer tape. The components of the reported groups are as follows:

CBS Magazine Network
- American Photographer
- Audio
- *Cycle World
- *Road & Track
- *World Tennis

Conde Nast Magazine Package
- *Glamour
- *Mademoiselle
- *Self
- *Vogue

Decorating and Craft Ideas (Creative Ideas for Living)/ Southern Living
- *Decorating and Craft Ideas (Creative Ideas for Living)
- *Southern Living

Golf Digest/Tennis
- *Golf Digest
- *Tennis

Golf Magazine/Ski
- *Golf Magazine
- *Ski

Hearst Magazines Corporate Buy
- *Cosmopolitan
- *Country Living
- *Good Housekeeping
- *Harper's Bazaar
- *House Beautiful
- Motor Boating & Sailing
- *Popular Mechanics
- *Redbook
- *Science Digest
- *Sports Afield
- *Town & Country
- *Colonial Homes

Hearst Man Power
- *Popular Mechanics
- *Science Digest
- *Sports Afield

Hearst Woman Power
- *Cosmopolitan
- *Good Housekeeping
- *Redbook

LHJ Family Group Combination
- *Health
- *Ladies' Home Journal
- *1,001 Home Ideas

McCall's/Working Mother
- *McCall's
- *Working Mother

Ziff-Davis Magazine Network
- Boating
- *Car & Driver
- Cycle
- Flying
- Popular Photography
- Skiing
- Stereo Review

*Also reported individually

OUTDOOR ADVERTISING AUDIENCES

The self-administered questionnaire left at the time of the first personal interview included special questions about frequency of travel in the past week, distance travelled, purposes of trips and modes of transportation. Responses to these questions, in combination with standard demographics, were used to develop the expected frequency of exposure of each respondent to three types of outdoor campaigns as follows:

100 SHOWING - 30 DAY AVERAGE FREQUENCY
30 DAY REACH
50 SHOWING - 30 DAY AVERAGE FREQUENCY
30 DAY REACH
25 SHOWING - 30 DAY AVERAGE FREQUENCY
30 DAY REACH

Note: 30 DAY AVERAGE FREQUENCY is NOT in 000's.

The complete details covering the development and implementation of the estimating procedure are included in the Technical Guide.

The reported 30 day frequency figures for a showing-size are estimates of the average number of exposures, per person exposed, provided by that showing size within a 30 day period (gross exposures divided by reach). The reported 30 day reach figures for a showing-size are estimates of the number of people exposed at least once to that showing size within a 30 day period.

METHOD OF MEASUREMENT FOR BROADCAST AUDIENCES

Radio listening on two weekdays and television viewing data were collected from a subsample of respondents to the 1984 Study of Media and Markets. In order to avoid the need to switch data bases depending on the data to be tabulated, SMRB developed an unbiased statistical procedure which assigned TV and radio data to each respondent not in the radio - TV subsample. The details of this procedure and the method of data collection are reported in the Technical Guide.

Radio

Radio audience measures reflect weekday listening during two separate weekdays. Audiences for total radio, formats and networks are reported on the basis of average daily (Monday through Friday) cume. (Average weekday cume is a description that can be used interchangeably.)

The average daily (M-F) cume refers to the total number of different persons listening to five or more minutes of an entire daypart averaged across the two weekday observations.

Formats and networks, wired and non-wired, are presented for the 6am to midnight daypart.

Format audiences are derived from the classification of radio stations using the Radio Programming Profile, published by BF/Communication Services, Inc., as the primary source. Other sources of format information, as well as the components of the reported formats, appear in the Technical Guide; network memberships are also reported therein.

Television

Estimates of television usage by daypart and network program audiences are based on two-week television diaries. Both measures are reported in terms of the average half hour, that is, the number of people viewing any part of each half-hour of a program or daypart is summed and divided by the total number of half-hours. Since each person kept a diary for a two-week period, the average half-hour audience for an hour program, shown once a week, would include the sum of all the people viewing each of the four half-hours (over a two-week period) divided by four.

Audience estimates for weekday daytime shows are obtained in similar fashion. However, since these half-hour shows are generally shown every weekday, the audience for each of the ten weekdays (over a two-week period) was summed and divided by 10, producing an estimate for the average half-hour.

Using TV Guides from one of the six weeks in the diary-recording period, all local (non-network) evening weekday newscasts of at least 15 minutes duration, between 4 p.m. and midnight local time were recorded in all survey areas. Such listings were derived from the Monday schedule unless that line-up was atypical (due to sports events, etc.), in which case the first available typical weekday was used. Viewing of a non-network newscast which occurred between 4 p.m. and 8 p.m. was classified as "early evening"; local news viewing which occurred between 8 p.m. and midnight was classified as "late evening". Local newscast audiences are reported separately for network affiliates and independent stations in terms of the average daily net audience: the number of persons viewing fifteen minutes or more of local news on each day are summed and divided by 10, the number of days observed, separately for "early" and "late".

The self-administered questionnaire included a question to determine the frequency with which itemized sports events were watched on television. Answer selections were: "occasionally," "frequently," "almost always." Viewers who responded "frequently" or "almost always" are grouped and are those that are in the reports for sports events.

CABLE TELEVISION

The estimate of households subscribing to cable television, as well as the estimate of pay cable subscribers, was obtained from the initial personal interview. (Pay cable had previously been obtained from the self administered questionnaire)
